

Implementation of the concept "national immunity"* to scientific turnover and its understanding by students

T.F. Melnychuk

National University of Life and Environmental Sciences of Ukraine

Forming a personality in a public spirit is foreground job of public policy. The principles of forming the civil position, system of the valued orientations of society, the concept of the state national idea, nation and immunity are given in the article. *The author got the Copyright certificate about registration of copyright on scientific work "Definition "National immunity" №55688 on 21.07.2014.

Suggested scientific development of understanding the definition "national immunity" is regarded as a steady civic position, confidence in principles of idea, realization of responsibility for the fate of nation, state and people. It is interpreted as a number of principles that form ability to **maintain imposing of stranger ideology, interference with consciousness and mental sphere of a person.**

The conducted analysis confirms that a national idea is a constituent of national immunity that consists of the national and cultural unity that is ingrained in the conception of spiritual development of country and ready to become a key one in forming the world view, and research concerning understanding and determination of the definition "national immunity" allows us to do the following conclusions:

1. Definition "National immunity" is interpreted is interpreted as protecting the nation from intervention from stranger ideology, maintenance of identity and originality of national history and culture from "pathogenic factors", association of all efforts of personalities in order to people's desire to see their country successful, and to promote the level of education of the nation.
2. The country, where national immunity is regarded as defense of its stable functioning, is compared to the living organism in which the processes of vital functions are in the state of dynamic equilibrium; ability of the bio-systems to support balance of internal environment and ability to resist to pathogenic external influence, harmoniously coexisting with an environment.

On the basis of the definition “national immunity” the sense of high national consciousness, human dignity, humanism, pride for the country under any circumstances, upholding principles on which the civil position of any individual in forming and development of his/her personality in a public spirit is built, is developed.

The scientific method of expert estimation in understanding the concept the “national immunity” was approved among the students of veterinary faculty of the National University of Life and Environmental Sciences of Ukraine. The analysis of results showed that in the process of vocational training of specialists in the nature-oriented universities, most students have a steady civic position, correctly interpret the concepts such as “the state national idea”, “the sovereignty and sovereignty of the state”, “nation and national immunity”, realize the role of national education in maintenance of cultural heritage and traditions of the Ukrainian people and understand the definition “national immunity” implemented into scientific turnover.
