

COMPONENTS OF PROFESSIONAL QUALITY HIGHER EDUCATION.

Kopilevych V. A.

The quality of teaching, professional education, competitional education, noospherogenesis

The principles of the systematic effective function on the quality of educational activity of higher educational institutions have been shown. This activity is based on noospheric-competence based approaches in the frameworks of the main positions formulated by International Commission of Council of Europe in combination with V.I.Vernadsky's theory of noospherogenesis.
