

## **SUBJECTS OF LEGAL RELATIONS IN THE FIELD OF FISHERY**

**L.O. SVIATCHENKO, *PhD(Law)*,**

***National University of Life and Environmental Sciences of Ukraine***

*This article discusses some aspects of the legal status of subjects of legal relations in the field of fisheries.*

### ***Fisheries, the subjects of legal rights and obligations.***

The functioning of the fisheries provide the subjects of fisheries and Tehnologichesky related businesses and organizations, or other businesses that provide activities and development of the region.

The aim of the article is to study some aspects of the legal status of subjects of legal relations in the field of fisheries in Ukraine.

The subject of the fisheries is a legal or physical entity that performs commercial fishing activity in accordance with legislation. Fisheries activities - the activities of legal and physical persons - entrepreneurs associated with the study of other aquaparks of biological resources, their protection, restoration, special use, processing, sale.

The rights of the subjects of fisheries are protected by law.

The harm caused to the subjects of fisheries unlawful actions of the Central bodies of Executive power, bodies mastervoodroid bodies, legal and natural persons, shall be compensated in the manner prescribed by law.

Artificial restoration of aquatic biological resources is exercised by the subjects of fisheries by breeding, moving, relocation of aquatic biological resources for the implementation of fisheries management.

Foreign legal and natural persons may, on a par with Ukrainian entities fisheries use of aquatic biological resources in the industrial, scientific or other purposes in the exclusive (marine) economic zone of Ukraine,

territorial sea, continental shelf, except water areas and objects of natural reserve Fund, the relevant permits.

When processing products of fishing have to be provided: the accounting of receipt of products of fishing, and also the accounting of production made of them; a constant control behind quality and safety of the products of fishing arriving for processing, and also the accompanying materials and food products from them; realization of the made food products and use of products of fishing for processing only in the presence of documentary confirmation of their quality and safety; inadmissibility of issuance, retirement and utilization of low-quality and dangerous production; obtaining requirements of normative documents under the terms of production, processings and transportations and storages of products of fishing and food products from them; prevention of negative impact of low-quality and dangerous production on environment and life and health of the population.

Today there is a need of creating favorable conditions for expansion of production of this type of production with attraction of the state intervention in the legislative sphere, providing privileges in the taxation, insurance and crediting of fish farms in combination with process of dating and increase in government procurements of fish.
