

**TECHNOLOGICAL PROCESSES FEATURES IN HORSE-BREEDING
ENTERPRISES OF LITTLE FORMS AT THE EXAMPLE OF THE
EDUCATION-PRODUCTION HORSE-SPORTING COMPLEX AT KSZVA.**

M.V. Lutsenko, M.P. Petrushko

Horse complex, technological process, multiprofile using, pedigree horses,
youngsters, tugging season.

Features of the basic technological processes management in horse-breeding at the example of the education-production horse-sporting complex at KSZVA with taking into account the specificity of its multiprofile activity are re-citing in this work.

The aim of reasearch – to characterize and analyze some of the features of the basic processes in small horses enterprises of small forms specific to their multidisciplinary activities, for example equestrian training and production complex in KSZVA.

Material and methods. Processing and analysis of data of mating and birth, quality, specialized training schemes, feed rations and welfare of different age-sex groups of equestrian complex at KSZVA horses.

Results. The difference of equestrian complex at KSZVA from the majority of horse households is the wide using of horses simultaneously in the learning process, breeding, sporting events and horse shows. This reduces the economic costs due to lack of necessary to hold the horses separate group for each of the above areas.
