

ESSAY ON THE HISTORY OF KYIV SCHOOL OF VETERINARY MORPHOLOGISTS.

M.M. Stegney

Veterinary Institute, Department of Anatomy, School Research, Kyiv School of
Veterinary morphologists.

Posted information on the activities and recognition of the Kyiv School of
Veterinary morphologists. Found that a prerequisite for the creation of this school
were scientific achievements of Professor V. O. Dombrowski in the direction of
comparative anatomy of vertebrates ventral muscles of the trunk, where in 1926
recognized his scientific school. Follower V. O. Dombrowski was V. G.
Kasyanenko, where thanks to his scientific achievements and recognized the Kiev
School of Veterinary morphologists that continues to exist today.

The aim of research – to trace the history of the establishment and representatives of
the Kyiv School of Veterinary morphologists.

Material and methods. During research was used the material of Kyiv State
Archives, Information Science Department of Anatomy Animals Academy the name
of VG Kasyanenko of NUBiP Ukraine and publishing periodicals.

The basis of methodological research is fundamental foundations of scientific
analysis - historical principle and consistency. During the conducting were used he
chronological and analytical methods.

Results. At a joint meeting of the Bureaux faculty councils of Kiev Polytechnic
University, (14 March 1920) was adopted a resolution of establishing the veterinary
faculty at this university.
