*In this article the correlation between recreation and tourism, and displays the basic legal concepts signs of tourism on the basis of which formed the author's definition of this concept.*

***Tourism, recreation, leisure, nature management.***

Established that tourism is only a form of recreation, along with treatment and rest. In view of this, it is proposed to consider the main component of tourism recreation unit, which includes the reproduction of lost leisure time in the life (work, study, home) mental, spiritual and physical powers of man, carried by generall (utilitarian), cultural and entertainment educational and recreation, tourism, spa treatment, hunting, fishing, fitness and sports.

Its main features are offered to consider:

- Bound movement rights outside their place of residence;
- The relative duration of a travel;
- Socio-economic. In other words, the purpose of tourism aims to meet human needs, not only in direct holiday (restoring physical and spiritual powers of man), but also professional and business and other purposes of tourism enterprises;
- Mass and organization;
- Compulsory use of natural resources.
